DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,361,368 to Tseng.

Tseng discloses a Christmas socket and corresponding lamp bulb.

Regarding claim 1

A Christmas lamp bulb (figure 3),

Including a lamp bulb (30), wherein the structure and shape of the lead wire terminal of the lamp bulb are I accordance with the inner hole of the lamp socket; that is, the inner end of the wire lead terminal is a cylinder terminal with the shape of a cylinder (figure 3, column 2, lines 49-53, "conical cavity"), whereas the outer end of the wire lead terminal is a rectangular terminal with the shape of a rectangle (figure 3, column 2, lines 54-56, "compressibly receive the wedge 21 of the holder 20); besides, two lead wires are leading out from the rectangular terminal (figure 3, wires 13 in contact with plate 131 in contact with filament feet 31) and they are bent separately in opposite directions to be attached to the two outer symmetric faces of the rectangular terminal.

Art Unit: 2875

Regarding claim 2, according to claim 1, wherein a protruded ring is provided at the outer end of the cylinder column (column 2, lines 50-52, "rim 202 remains proud of a top edge of the upper portion)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,361,368 to Tseng in view of USPN 2,053,138 to Donovan or USPN 5,701,051 to Lin

Regarding claim 3, according to claim 1, wherein a plurality of protruded bars in an axial direction is distributed uniformly at the outer end of the cylinder terminal

USPN 6,361,368 to Tseng. does not have a plurality of protruded bars in an axial direction.

Donovan and Lin teach in a miniature lamp the use of protruded bars (18) [138], (48,50) [051] in an axial direction.

It would have been obvious to one of skilled art at the time of the invention to provide

Tseng with protruded bars in an axial direction as taught by Donovan or Lin. The reason is that
the plurality of protruded bars in an axial direction insure that the lamp is correctly positioned in
the socket.

Art Unit: 2875

.Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James W. Cranson whose telephone number is 571-272-2368. The examiner can normally be reached on Mon-Fri 8:30A.M.- 5:00P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandy O'Shea can be reached on 571-272-2378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
